

Group Leader Formulation & Analytics (MP0132)

Molecular Partners AG is a thriving and steadily growing clinical stage Biotech Company located in Zurich-Schlieren, Switzerland. The development of a broad portfolio of therapeutic product candidates in oncology and ophthalmology based on our proprietary DARPin platform allowed a successful listing of the company on the SIX Swiss Exchange (MOLN). Next to our own proprietary pipeline of drug candidates we have entered into collaborations with international pharmaceutical companies, including Allergan.

To support our Formulation and Analytics (F&A) team, we are looking for an experienced and dedicated Group Leader to join our CMC group.

This challenging and diverse position will include the following tasks and responsibilities:

- Provide strong leadership to the F&A group including direct supervision and training of senior team members
- Development of a state of the art analytical platform to support ongoing and future clinical stage projects
- Design and evaluation of internal stability, forced degradation, compatibility and comparability studies
- Development of formulations for DARPin proteins
- Oversight of transfer, implementation and validation of analytical methods to and at GMP vendors
- Support of GMP compliant manufacturing e.g. by setting of specifications, review of release and stability data, shelf life assignment
- Responsibility for specific parts of clinical trial application dossiers including definition of analytical characterization packages adequate for the development stage in question

We are looking for a highly motivated individual with a Ph.D. in life sciences from a recognized university, with at least 5 years of relevant analytical experience in the biotechnological or biopharmaceutical industry including continuous training.

You should further bring along:

- Proven record of successful leadership
- Track record of successful submissions to regulatory authorities and compilation of applicable IMPD sections for late stage clinical trials
- Demonstrated late stage product characterization experience
- Hands-on experience of protein analysis methods such as HPLC, electrophoresis and particle analysis
- Knowledge of protein formulation development would be an asset
- Team player attitude paired with excellent organization skills
- Experienced user of MS office and statistical software
- Proficiency in English including excellent writing skills, German is a strong asset

The successful candidate will lead a highly motivated, dynamic team strongly involved in formulation and analytical development as well as external manufacturing of DARPin molecules designed for clinical studies. If you are interested in working at Molecular Partners, we are looking forward to hearing from you! Please submit your detailed curriculum vitae online to:
